Safety of mycophenolate mofetil in the treatment of Takayasu's arteritis. Infliximab has revolutionised the treatment of Takayasu's arteritis, but tumour necrosis factor alpha (TNFalpha) neutralisation may result in serious side effects. Mycophenolate mofetil (MMF) has been successfully used for the treatment of autoimmune diseases, especially renal disease. We describe our experience of MMF treatment in Takayasu's arteritis, a disease responsive to high-dose steroids. Four patients with Takayasu's arteritis were treated with MMF. Each received MMF at a dose of 2.0 g daily for the first three months, 1.5 g daily for a further three months, then 1.0 g daily indefinitely. All received oral steroids (20-40 mg/day) throughout treatment. All were enrolled on the remission arm of the Mycophenolate Mofetil in Takayasu's Arteritis (MYSTAR) trial. All four patients responded to treatment and maintained their remission at a median follow up of five years. There was no evidence of adverse side effects. MMF represents a potentially safe alternative treatment for the treatment of Takayasu's arteritis. he shot from the field house, the game went on and I was happy to see that we were giving it our all and at times looked like we might end it winning, but for some reason my guy's basketball folks just couldn't "do it" and just as the season was getting to the point where we might be prepared to offer my guy a scholarship, the Lady Ravens ended up beating us, but we couldn't find out why. If there is a Monday Night Preseason game in 1999, we won't be watching and I'm just hoping we finally get to witness what we missed in 1998. He was a first team All-State selection in 1996 as a 6-8 junior, but has the numbers of a hard-working 5-10 sophomore. He averages 15.2 points and 10.9 rebounds this season for a Chippewa Falls team that is undefeated. Meek was the leading rebounder and third leading scorer in the state in 1995-96. YahZow I've been using a number of Pixels (both tablets and phones) for a while now, and I have to say, I love the device. But when I go to run the app on my PC/Mac I get a bunch of pesky error messages. I went through the app's "Help" window (which is a great way to find out about the app), but found nothing I could do to get this to work. I first tried to just open the yahZow.exe file directly through my browser (browse to yahZow.exe). I got the above error message (and many others). I tried to install the "Windows" version of the app: I chose this from the app's list when it asked me what I wanted to install. The installer did install the app, but in the "Ready" window I then got the same error message in the "Done" window. I've tried to uninstall the app, and start over. I've tried to uninstall the entire program, uninstall the program on my Mac, reinstall, use the "Install" button, etc. No dice, I'm sure I've tried everything. Here are some other errors I get from what looks like the install process: I get a "Software uninstall failed" message box when I try to uninstall yahZow.
