Saturday's FA Cup success over Bournemouth was the Gunners' seventh win of the season, which takes them top of the Premier League table. A late Merseyside derby loss to Everton and an early goal against Swansea this month has temporarily seen them slip into fifth place, but Wenger is confident the worst is yet to come. Arsenal have always given Champions League qualification priority, but Wenger admits he is not concerned about it until the final day of the season. "What is important is to get more points than the teams behind us. So it is very close. We don't want to think about the Champions League yet," Wenger said. "We want to concentrate on the domestic games. This FA Cup is more important to me than the Champions League." However, while Wenger is keen to rest his players for the final match of the season against Brighton, he insists he will not be dissuaded from rotating his squad if they continue to win. Arsene Wenger told Arsenal TV that he is not trying to rest players Arsene Wenger told Arsenal TV that he is not trying to rest players "I don't know [about rotation]. I can't

Run the autocad.exe (first time you open it, your licence will be renewed automatically) LONDON (Reuters) - As bad weather lingers into the World Cup, Fifa is stepping in to try to clean up the pitches, after a number of matches were called off because of heavy rain, mud and snow. Goalkeeper David de Gea and footballer Neymar are seen during a training session at the National Training Center in Colleverde (Portugal), July 19, 2018. REUTERS/Rafael Marchante Fifa said on Friday that five nations - Argentina, Austria, Colombia, Italy and Mexico - would have new pitches with better drainage, while Japan and Senegal would be given new grass to create a pitch that was "easy to pitch on, more pliable, and covers the field". The five teams will all get either new or improved pitches over the next three days, with the two-hour practice match between England and Tunisia - scheduled to be played on Friday - also having a new surface. "There is no way we can tolerate the risk of disruption and potential injury to the players and fans on the field," said Fifa football development officer Christoph Freund. "All the pitches at the World Cup are in deplorable condition, especially the older ones. Some of them have not been watered since the first match and for others, the fields have been churned up from all the visiting spectators, the showers and rainstorms." Fifa is requiring all stadiums hosting matches to have new and improved pitches, and has put in place a rolling plan of action for those that are deemed not up to scratch. "We will continue to take action against clubs and countries who have bad pitches at their disposal," added Freund. Fifa's Chief Medical Officer, Joao Lourenco, said the organisation would also look to "assist our medical team in their visits to local authorities and clubs to monitor the state of the pitches for upcoming matches". "It is clear that if we are to achieve our aim of a smooth and fair competition, and ensure a safe and healthy event, we need to be as proactive as possible and this is a prime example of why we take such action." England's FA
