In the stories, the evil Doctor Who only pops up in the great beyond, leaving the comic book heroes to do all the work. That's a little disappointing, and yeah, it's a bit of a cop out, but it is the truth of it. The creative team (writer Dan Abnett, artist Lee Sullivan) know that the Doctor is not going to appear on screen, not really, and they concentrate on telling the story from that perspective. Perhaps this Doctor Who 'feature' is more than that though, as its creator, David Roden, is also the creative force behind DC Comics' Sons of Gotham. If the lead didn't give it away, read the Doctor Who feature, and you'll discover that the writer and artist of the series are among the creative team behind the DC Comics spin-off, Sons of Gotham. Dan Abnett wrote the feature alongside artist Lee Sullivan; which is slightly more than the DC Comics creative team of writer Jim Lee (Lex Luthor) and artist Andy Kubert (Clint Barton). DC Comics have already added an Earth-Three to their DCU, so you might think that any future that DC produce would focus on that world, but I think that this spin-off is somewhat of a new direction. I think that this is a sneaky indication that there may well be a further adventure to come for The Doctor as well as his companions. The main story comes from a concept that Dan Abnett suggested; an intergalactic chase. The galactic police are chasing a shapeshifting criminal, so The Doctor has to stop him while the police take him into custody. The Doctor's regenerations take him to different alien races, which is a little vague, and each race has a different culture. Each race seems to have a familiar look, so it's unlikely that the alien races are really different, but that does add some great character development. The way the story is told is very interesting, as it flips between The Doctor and the police as they travel across space. The original plan was to have The Doctor, River Song and Amy locate the crashed spaceship and rescue its occupants. But that plan was scrapped for the sake of the story, and the story stands better with The Doctor and his companions out there as they race against time to stop the alien criminal. If the characters on the spaceship are baddies, then it sets up the world nicely for
