all you need to do. Special thanks to: -Block User'for the guimaker he gave me tons of stuff and
helped me get a better guitar. -ShowTime for helping me out and sending me the.nsu file -NINJAK for
graciously letting me use his files for building the mod I've worked on this guitar quite a while now
and still want to keep it as fun and free-form as it's always been. This project is not meant to be a
guitar replacement, or even an amp guitar. This is just a fun project to mess around with and maybe
use as a base for other guitars. Everything in the expansion pack is in.nsu format. This means it is a
numerical and not visual file, as is the case with.zip files. I have tested this with a variety of
GuitarFreaks songs. All of the songs in this pack have their images and sounds working properly. If
you play them, you will hear all of the sounds and see all of the images. If you have any questions,
problems or ideas, feel free to ask. I'll be on all day and would be happy to answer any questions. I'll
respond to every email I get. And if you have any similar ideas, I'd love to hear it! Download
Changelog: 02/22/2017 - Version 1.1 Update for new expansion pack, changes the deomonstrator to
the 02/25/2014 pack. 01/23/2017 - Version 1.0 Original release. I think this will be the last update for
the nexus expansion pack, I think I have
