and theres my 5th time watching this film, i loved every minute, and im not a fan of horror films, so i cant speak for the quality of this film. but its thrilling, sometimes very shocking, and one of the best films i have seen, its often disturbing, yet its often beautiful. i like movies with a bit of grit. i like images to make me think and i feel like this film does that. i also like films that have a lot of dialogue, but this film is not too bad on that front. imdb rating: n/a movie name: a man and a woman genres: horror director: artistaya arriyawongsa stars: latthgarmon pinrojnkeerathi, suchada poonpattanasuk movie quality:480p webrip file size: 250mb language: hindi dubbed format: mkv mp4 film story: in a small town where there is not much prosperity, they believe in spirits and are dominated and influenced by those spirits. they live in a world of ghosts, spirits, and spirits of humans. when the spirit of a girl named soujou comes into the life of the town's eccentric mechanic, he becomes determined to help her, but he soon learns she wants to harm him. the ghosts that have haunted him for so long, and the spirits that are possessed by them, must be stopped. my workflow is thus 1. make a to do pile, its a combination of recommendations, stuff ive been enjoying myself, stuff i want to rewatch. i try to keep a mix of styles.genres/directors and dps so i dont get bored while working. 2. i watch through the movies on vlc, usually between 3x and 4x speed while listening to podcasts, grabbing any frame that interests me. depending on mood i could spend a few hours just doing the grabbing 3. this usually leaves me with around 200-250 frames per film. so

the next step is to edit, usually there might be a week or 2 between the first grab and this edit stage. i view all the frames as a slideshow and i remove any frame that there are doubles of (someone might be blinking in first frame and normal in second) or remove any that seem less interesting this time around. 4. im then left with usually around 80-100 really interesting frames. i go through the folder again (immediately)looking at the frames on large preview and try and remove frames that replicate a certain lighting style or framing. and bring down the number of stills to my 60-65 golden number. 5. i run the images through a batch encoder with irfanview to get rid of black borders on the image, rename the files, and conform them to jpg. 6. upload the images to wordpress and in zip form to mediafire, format up the post link everything as necessary, and im done
