What does it take to create a character that is both believable and exciting? The creators of this game examined every element of the human body and all of the ways in which a person interacts with the world. They didn't just take the most ridiculous body shape they could find and assign a bunch of random attributes to it. Not only are the movements of these ships incredible and authentic, but they can be used in incredibly varied ways. The further you are, the more land you'll be able to cover at any one time. The further the family, the more animals you can carry. It really is the most engaging and realistic simulator of their kind on the market. The soundtrack will kick your ass. Two new breeds have been added to the eight in Ship Simulator 2: Classic & Futuristic. Classic sims are great for the traveler who prefers a more adventurous way of life, but not completely broken, while Futuristic sims are perfect for those who just want to get some thrills in their life. You can choose one of them as your ship, and the others will be waiting to be discovered. Now that we have exotic breeds, including the red wolf, canines, and cats, has also added new cargo and passenger options to this great game. There are two new ship classes, including pleasure craft and cargo ship. Cargo ships are outfitted to transport passengers and cargo. That means that they have swimming pools, restaurants, and decks for passengers to hang out on. Passenger ships are equipped to transport people on pleasure trips. Thanks to the new ship class, you have the option to perform your own boarding and disembarking operations.
